Backend Developer specified in PHP, Laravel, and WordPress with a strong background in Node.js, Angular, and Vue.js. Delivering scalable, secure solutions with a focus on efficiency and long-term support.

PROFESSIONAL EXPERIENCE

IT-Plus, Giza, El Sheikh Zayed

2021 – 2024

Software Engineer

- Led backend development with PHP, Laravel, Symfony, and CodeIgniter, delivering scalable and high-quality solutions.
- Developed real-time live streaming features using Socket.io and WebRTC for a Learning Management System (LMS).
- Built hybrid mobile applications using Ionic Angular with Capacitor, ensuring cross-platform compatibility.
- Optimized application performance through advanced caching and implemented robust security measures.
- Integrated payment gateways for multiple user roles, streamlining course subscriptions and enhancing user experience.

Softa Solution, Alexandria, remote (part time)

2022– 2024

Software Developer

- Led successful delivery of complex projects, managing a developer team to meet deadlines while maintaining high-quality standards.
- Introduced Agile methodologies, improving team efficiency and productivity.
- Provided technical mentorship and coaching, fostering continual learning and professional growth.
- Ensured scalable, high-quality code through regular reviews and best practice implementations.
- Promoted cross-functional collaboration, uniting development, design, and QA teams for cohesive project outcomes.

RB, Cairo, Nasr City, remote (part time)

2021 – 2022

Full-Stack Developer

- Oversaw intricate projects, implementing Agile practices to streamline processes and enhance team efficiency.
- Provided technical mentorship, fostering continuous learning and conducting regular code reviews for scalable, high-quality code.
- Facilitated cross-functional collaboration between development, design, and QA teams, promoting effective communication and knowledge sharing.

Top-Learning, Alexandria, remote

2020– 2021

Full-Stack Lecturer

- Taught programming fundamentals and software creation, focusing on Angular, Laravel, and WordPress.
- Developed course materials and hands-on projects to enhance student learning and practical application.
- Applied advanced development techniques and stayed updated with industry trends to ensure relevant instruction.

FREELANCER EXPERIENCE

Saudi Arabia (Network)

present

PHP Laravel, Ionic Angular (Flower E-Commerce Mobile App) <https://baqet-ward.com>

I was nominated by a friend of mine in Saudi Arabia to create an online store for a store in Saudi Arabia called Bouquet of Roses. We started analyzing the project, requirements, and design, then the control panel and the application are about to be launched.

- Delivered high-impact applications for Saudi government agencies, meeting stringent security and quality standards.
- Demonstrated advanced proficiency in C# and SharePoint integration, creating scalable and secure solutions with best practices in software architecture.
- Implemented rigorous quality assurance protocols, including automated testing and continuous integration, optimizing performance for heavy loads.
- Utilized modern cloud technologies for enhanced application reliability, scalability, and cost-effective deployment.
- Managed client relationships and provided regular updates, ensuring alignment with project objectives and incorporating feedback effectively.

Saudi Arabia (Network)

2023

C# SharePoint On Premise

My friend contacted me. He worked for a prestigious organization in the Kingdom of Saudi Arabia. He wanted to help me with some projects as a freelancer. The projects were for sovereign organizations in C#. I welcomed the help, and although I did not have much experience with this technology, I learned quickly and helped as much as I could.

- Delivered high-impact applications for Saudi government agencies, meeting stringent security and quality standards.
- Demonstrated advanced proficiency in C# and SharePoint integration, creating scalable and secure solutions with best practices in software architecture.
- Implemented rigorous quality assurance protocols, including automated testing and continuous integration, optimizing performance for heavy loads.
- Utilized modern cloud technologies for enhanced application reliability, scalability, and cost-effective deployment.
- Managed client relationships and provided regular updates, ensuring alignment with project objectives and incorporating feedback effectively.

EDUCATION

management information system , modern Academy, Cairo

2022

Bachelor of management information system

- Activities and societies: Karate, chess, and Rubik's Cube 3x3 competitions
- I have worked as a full stack web lecturer since my first year in university. In 2020, I joined GDG (Google Developers Group). While I delved into competitive programming and logical thinking competitions, by 2021, I transitioned to a role as a software team leader at it-plus software solutions.

JAVA Development, Information Technology Institute (ITI)

JAVA SPRING BOOT DEVELOPMENT

2023

- got ITI- 3 month diploma, Java Department- 2023
- Advanced Developing Web Applications using Java Servlets and java server pages (JSP) and java spring boot
- Asynchronous and JavaScript & XML (AJAX). Java Server Faces (JSF).
